## Activity Report

### 1. Understanding Theory Courses

Students used different online platforms to access reading materials and contribute to discourse in multimedia facilitating comprehension. Better understanding emerged from participating in ICT workshops.

An ICT (Information and Communication Technology) workshop was conducted for student teachers in their 4th semester of the B.Ed. program on 17th to 19th of January 2024. This workshop aimed to equip them with the necessary skills and knowledge to integrate communication and ICT effectively into their teaching practices. The first day dealt with various ICT tools and platforms for communication and teaching. Develop skills in using ICT tools for lesson planning, resource creation, and assessment. Discussion on strategies for effective communication in the digital classroom was done using spreadsheet, creating google docs, E-content development, google slides, google form etc. second day was concerned with more such tools as Canva, Trello, Ed puzzle, YouTube, google classroom etc. the third day added new trends of AI (artificial intelligence) in creating a blog, website, online assessment tools, video editing tools, mobile apps and voice typing etc.

  
PRINCIPAL  
Jesus Training College, Mala

Another ICT workshop was conducted on August 14th, 2023, with Jain James discussing artificial intelligence tools such as Chat GPT, Midjourney, Figma, Freepik, and Background Remover. The workshop was highly beneficial for the students.

PowerPoint and video were used to present the seminar, making the content engaging and visually attractive. Such a strategy improved comprehension and held the audience's attention over the course of the session.

## 2. Practice Teaching

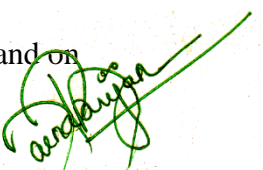

Learners carried out online classes that enabled them to receive a variety of feedback and reflect on their teaching strategies. The micro teaching sessions were recorded for review purposes.

## 3. Internship

During internships, ICT tools facilitated seamless communication and task management. Digital logs kept by students helped them reflect on what they had gone through as a means of tracking progress. Students always kept a remote communication with their mentors to improve their teaching process. Weekly Google Meet sessions were conducted to ensure consistent communication and collaboration. This regular schedule helped keep everyone engaged and on track with their progress.

#### 4. Out-of-Classroom Activities

Social media platforms together with mobile applications were employed for continuous learning outside the lecture room. An e-portfolio served as a digital log for student achievers and projects.

## 5. Field Sports

ICT made things more productive, got people more involved, and helped track how well things went.

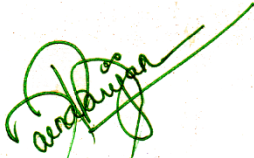

ICT tools made registration and scheduling easier. People could do it online, which cut down on paperwork and mistakes. Software for scheduling helped those in charge plan and set up events well. This meant things ran with less waiting around.

Students used social media and chat apps to share info like when events were happening, maps of where things were, and any changes at the last minute. This meant everyone taking part or watching knew what was going on, which got them more involved.

Using ICT to run sports day changed the old approach making it more productive, engaging, and based on data.

These ICT tools and activities together promoted student learning across diverse educational contexts, building both theoretical understanding and hands-on skills.
